

Employment Opportunity in Chelmsford (Greater Sudbury), Ontario

Site Operator – Part Time Hourly Position

Denison Environmental Services (DES), a division of Denison Mines Inc., (Elliot Lake ISO 9001:2015 registered) is a nationally recognized leader in the supply of mine care and maintenance (C&M), mine-site decommissioning and environmental consulting services across Canada.

DES is seeking a part time/on-call Site Operator for a closed site in proximity to Chelmsford, Ontario. The regular work week for this position is expected to vary and is dependent on seasonal site requirements, which for the most part are dependent on precipitation received at site and the requirement to provide dewatering activities.

Requirements:

- Able to work well independently and safely with minimal direct supervision.
- Valid (clean) Ontario drivers' license.
- Working background in preventative maintenance and the operation of generators, pumps (5 years minimum).
- Experience in refueling equipment and the safe handling of gasoline, diesel, and propane.
- Experience or working knowledge of carpentry, pipefitting, or other trades considered an asset.

Duties to include but are not limited to:

- Maintain consistent generated electricity and heat to the Security Trailer for contracted Security Company.
- Respond to callouts for water management activities and general maintenance as required.
- Review and transmit site field data to DES Project Manager (PM) including, but not limited to fuel levels and fuel delivery amounts, site water elevations, running hours on generators and pumps, and visitors/contractors at site.
- Regular transport of fuel for refuelling of site generators and equipment to provide uninterrupted service as required.
- Regular provision of preventive maintenance to on site generators, pumps and equipment and/or provide repair and/or replacement support as needed.
- Winterizing of pumps and pumping/pipeline systems as required.
- Notify supervision and provide equipment maintenance, repair and/or replacement as necessary.
- Monitor, maintain and replenish necessary site supplies (fuel, filters for generators, consumables, etc.) as required to ensure continued operation of site processes and equipment.
- Assist DES PM with scheduling requirements and coordinating activities on site.
- Provide complete, accurate and timely reports as required and provide input to reporting as required.
- Awareness of DES or Client property, and reporting of concerns in a timely fashion
